

A place to collaborate, a place to develop

A blurred photograph of a person with long hair walking down a staircase with a metal railing. The background shows a modern building with large windows.

Working at the St. Pölten
University of Applied Sciences

Why work at the St. Pölten UAS?

Working at the St. Pölten University of Applied Sciences – this means a professional activity with added value and room for individual creativity. Team-oriented collaboration across disciplinary borders, personal exchange with students and colleagues, and a variety of opportunities for individual growth make working at the UAS interesting and diversified.

The St. Pölten UAS offers a meaningful occupation with a wide range of possibilities. True to the motto “A place to collaborate, a place to develop”, teaching, research and administration staff work together in interdisciplinary teams to participate in the shaping of our future. At the same time, they are given enough room for individual development and personal growth.

With more than 3,000 students, the St. Pölten University of Applied Sciences is a key player in the Austrian higher education landscape and one of the most important employers in the region. Furthermore, our university distinguishes itself by its future-oriented and steadily growing number of study programmes, a strong interdisciplinary collaboration, and the strength of its research.

The St. Pölten UAS allows its staff members to really live the link between theory and practice, research and teaching, instead of growing ‘old’ in the ivory tower of science. This helps to build a bridge to society.

FH-Prof. Ing. Dr. Harald Wimmer
Academic Director Media and
Communications Consulting (MA)

I appreciate the familiar atmosphere and the positive collaboration at the St. Pölten UAS.

Lukas Witschko
Systems Engineer, service unit IT
and Infrastructure

Diversity is not just a word at the St. Pölten UAS. The greater the differences between people, the more they can learn from each other. Working on a common goal makes cultural barriers and differences disappear.

Muntaha Sakeena
Junior Researcher

Our Values as an Employer

We offer room for innovation because we know that current challenges need solutions and ideas. Our work is varied and provides opportunities for professional and personal growth through interdisciplinary exchange with other teams.

We focus on the human being and personal contact always comes first. We share our knowledge not only with students but also with colleagues, our partners and society. Working in teams brings us closer together and promotes exchange – across disciplines and beyond the borders of our country.

We are a major player in the Lower Austrian landscape of universities of applied sciences and one of the most important employers in the region. We have grown steadily over the last few years and have continuously expanded our research activities. Our future-oriented range of studies meets the current needs of the labour market – thus providing our graduates with excellent career opportunities. We take on social responsibility and are dedicated to a sustainable development.
